error of code:

```
print("Event Registration")
events = ["Seminar", "Workshop", "Hackathon"]
participants = []
name = input("Enter name: ")
event = input("Enter event: ")
if event in event
participants.append(name)
else
print("Event not available")
print("Name:", name)
print("Event:", Event)
for i in range(3)
print("Registered")
print("End")
```

Solution:

```
print("Event Registration")
events = ["Seminar", "Workshop", "Hackathon"]
participants = []
name = input("Enter name: ")
event = input("Enter event: ")
if event in events:
    participants.append(name)
else:
    print("Event not available")
print("Name:", name)
print("Event:", event)
for i in range(3):
    print("Registered")
print("End")
```

Output:

The screenshot shows a terminal window titled "Run" with a tab for "main". The command executed is `C:\Users\DELL\AppData\Roaming\uv\python\cpython-3.13.11-windows-x86_64-none\python.exe C:\Users\DELL\Desktop\karmanya\main.py`. The program output is as follows:

```
Event Registration
Enter name: Hackathon
Enter event: 3
Event not available
Name: Hackathon
Event: 3
Registered
Registered
Registered
End

Process finished with exit code 0
